# MAHMUD MUNNA

+8801739104635 | Uttara, Dhaka, Bangladesh
smbmunna@gmail.com | Github

## Professional Summary

Aspiring Web Developer with practical experience gained through building multiple projects during a comprehensive web development program, including React-based applications and MERN-stack projects.

Worked as an ERP Implementation and Support Manager, where I collaborate with development teams, troubleshoot technical issues, and conduct user training sessions—strengthening my problem-solving, system analysis, and communication skills.

I am eager to join a web development role where I can leverage my experience to create meaningful applications and tackle real-world challenges.

## Skills

JavaScirpt | TypeScript | React.js | Tailwind | Git | Node.js | Express.js | Vercel | MongoDB | PostgreSQL

## Projects

**Gamers Hub – Video Game Discovery Application** Live link Github link

A game discovery app using React, TypeScript, and Chakra UI, fetching real-time data from the RAWG API

- Dynamic filtering & search allows users to browse games by genre and platform.
- Optimized image loading with a custom image cropping service to efficiently render game images.
- Ensured type safety with strict TypeScript interfaces for API responses and component props.
- Dark/light theme switching using Chakra UI's theming system, for a seamless user experience.
- Fully responsive mobile layout ensures consistent and accessible UI across all devices.

**Bookshelf – Library Management System** Live link Github link

A full-featured library application where users can borrow and return books with an intuitive interface.

- User authentication with email/password and Google social login.
- A dedicated “Books” page showcasing all available and popular books for borrowing.
- Borrowing functionality that securely stores user-book records in the database.
- Personalized user experience with a built-in light/dark mode toggle.

## Experience

**ERP Software Implementation and Customer Support Manager** **Sept 2020 – Feb 2026**
**Arefeen Software Ltd. (Dhaka, Bangladesh)**

- Address and resolve customer inquiries related to ERP software modules and features.
- Provide technical assistance to clients, ensuring efficient resolution and smooth system operation.
- Conduct user training sessions to improve proficiency and overall software adoption.
- Collaborate with development teams to report issues, user feedback, and product enhancements.

## Key Achievements

- **Implemented real-time attendance management solutions** for multiple clients by integrating biometric attendance devices with SQL Server databases, enabling automated live attendance reporting within the ERP system.
- **Introduced a QR-based employee information system** within the human resources module, enhancing data accessibility and reducing manual lookup processes.
- **Successfully deployed a Document Management System** built on ASP.NET, digitizing previously handwritten workflows and streamlining document handling for clients.
- **Conducted a comprehensive 4-day ERP usage and implementation training workshop** at *S.S.R Institute of Technology & Management* for **40 participants**, delivering hands-on sessions on system workflows, practical usage, and ERP implementation best practices.

## Education

**Complete Web Development Course - (2023-2024)**
JavaScript, HTML, CSS, REACT.js, Node.js

**Diploma in Computer Science and Application (DCSA) - (2015-2016)**
Department of Computer Science and Engineering
University of Rajshahi

**Bachelor and Masters of Science (2012-2018)**
Population Science and Human Resource Development
University of Rajshahi
