Professional Summary

Web Developer with hands-on experience building full-stack web applications through practical projects and structured web development training, using React.js, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, and MongoDB.

Brings 5+ years of professional experience in ERP software implementation and technical support, including system troubleshooting, client communication, user training, and collaboration with development teams.

Seeking a Junior Frontend or Full-Stack Developer role to apply my web development skills while leveraging my professional experience in software systems and client-facing technical work.

Skills

Technical Skills: JavaScript | TypeScript | React.js | Next.js | Node.js | Express.js | Prisma | PostgreSQL | MongoDB | Git

Professional & Domain Skills: ERP Software Implementation | Technical Support | System Troubleshooting | Client Communication | User Training | SQL Server

Projects

Nextgen Gamers Hub – Fullstack Video Game Rental Application Live link Github link

A full-stack video game rental platform built with Next.js and Express, featuring Prisma ORM, PostgreSQL, and JWT secure authentication.

- Next.js (App Router) frontend and a modular Express.js REST API deployed on Railway.
- Implemented robust database management using **Prisma ORM** with **PostgreSQL** (NeonDB).
- Engineered secure Server Actions with **Zod schema** validation to handle data validation.
- **JWT authentication** with HTTP-only cookie session management to protect sensitive routes.
- **Implemented strict TypeScript** typing across the full stack to improve maintainability.

Rise at Seven Landing Page - Frontend Live link Github link

A responsive frontend landing page developed for an organization, focusing on modern UI design, responsive layouts, reusable components, and an engaging user experience.

- Built the responsive interface using **React.js and Tailwind CSS**.
- Developed reusable UI components and structured page sections for maintainability.
- Optimized the layout for **desktop, tablet, and mobile** screen sizes.

Experience

ERP Software Implementation and Customer Support Manager **Sept 2020 – Feb 2026**
Arefeen Software Ltd. (Dhaka, Bangladesh)

- Address and resolve customer inquiries related to ERP software modules and features.
- Provide technical assistance to clients, ensuring efficient resolution and smooth system operation.
- Conduct user training sessions to improve proficiency and overall software adoption.
- Collaborate with development teams to report issues, user feedback, and product enhancements.

Key Professional Achievements

- **Implemented real-time attendance management solutions** for multiple clients by integrating biometric attendance devices with SQL Server databases, enabling automated live attendance reporting within the ERP system.

- **Introduced a QR-based employee information system** within the human resources module, enhancing data accessibility and reducing manual lookup processes.

- **Successfully deployed a Document Management System** built on ASP.NET, digitizing previously handwritten workflows and streamlining document handling for clients.

- **Conducted a comprehensive 4-day ERP usage and implementation training workshop** at *S.S.R Institute of Technology & Management* for **40 participants**, delivering hands-on sessions on system workflows, practical usage, and ERP implementation best practices.

Education

Complete Web Development Course - (2023-2024)
JavaScript, HTML, CSS, REACT.js, Node.js

Diploma in Computer Science and Application (DCSA) - (2015-2016)
Department of Computer Science and Engineering
University of Rajshahi

Bachelor and Masters of Science (2012-2018)
Population Science and Human Resource Development
University of Rajshahi
